

LogisticalFlow::execute

```
graph LR; A[LogisticalFlow::execute] --> B[Flow::getTarget]; A --> C[System::getValue];
```

The diagram illustrates a call graph where the method `LogisticalFlow::execute` (represented by a grey box) calls two other methods: `Flow::getTarget` and `System::getValue` (both represented by white boxes). Two blue arrows originate from the right side of the `LogisticalFlow::execute` box and point to the left side of the `Flow::getTarget` and `System::getValue` boxes respectively.

Flow::getTarget

System::getValue
